EMPOWERING MANUFACTURING EXCELLENCE: KINSMEN GROUP & REDEYE.

The world depends on industrial operations – but 71% of engineers can't find the right information when they need it. The collaboration between Kinsmen Group and RedEye solves engineering, operations, and maintenance data challenges while fast-tracking digital transformation.

RedEye, Accruent's SaaS digital disruptor, revolutionizes engineering document management with its powerful yet simplified user experience. The cloud and mobile platforms seamlessly integrate with and enhance existing ERP, EAM, GIS, Safety, and compliance systems, offering comprehensive support for core business operations.

Groundbreaking Partnership, Powerhouse Performance

As Accruent's leading global partner, Kinsmen Group implements RedEye to control and improve the accessibility of key information for a manufacturing facility. Augmented by Kinsmen AI, which cleanses, deduplicates, and locates missing critical drawings and data, ensuring a smooth migration of essential content into RedEye.

The result: a SaaS solution that quickly increases process manufacturers' productivity, safety, and uptime.

The age-old problem of information chaos is finally resolved.

No more hassles with years of content cleanup and migration before reaping the benefits of a document management system investment.

Interconnected Digital Ecosystem

RedEye enhances your business infrastructure by integrating with your existing systems to create a digital ecosystem that delivers precise data and insights for decision-making and efficient operations. Additionally, RedEye's integration with Microsoft Office 365 allows for the storage, editing, and collaboration on asset documentation within the same platform, ensuring access to the latest engineering drawings, 3D models, and related documents.

Cost Savings

RedEye's SaaS solution and unlimited user model **not only eliminate infrastructure costs but also help large teams save money**. Additionally, reductions in unplanned downtime and the costs associated with safety inspections further contribute to the cost savings.

Data Contextualization

Kinsmen AI helps **extract and contextualize your most valuable data** – giving your team the insights they need when they need them most.

Delivering Insights On-Demand

RedEye DMS offers native iOS and Android apps, enabling users to access the platform anytime from their mobile devices or web browser. Features include digital signatures and markups, automated workflows, and multimedia attachments. Like popular search engines, the solution provides highly relevant search results by leveraging embedded metadata, native file extraction, enhanced manual processes, and Optical Character Recognition (OCR), allowing users to filter and find relevant information effortlessly.

Full Automation

Eliminate manual email exchanges, streamline tracking, and simplify scheduling. RedEye ensures that all information from design, projects, and assets is delivered efficiently through automated workflows and approval processes.

Purpose-built for asset owners

Kinsmen Group and RedEye by the Numbers

#1 Global engineering information management solution

Manages more than

$450bn in assets globally

80% Reduction in search time

100% Customer satisfaction

Enhanced Content Navigation with GIS Map View

Efficiently locate content relevant to your department through intuitive search functions, list and map views, or by scanning a QR code directly from the equipment.

Discover the Kinsmen Difference

As the leader in digital transformation for asset owners, Kinsmen Group services extend far beyond software implementations. Our customer-first approach takes care of every user with direct training and adoption support; our consultants assist you throughout your journey so you can count on people who already know your environment. Advanced AI, machine learning, and data extraction tools mean smooth data migration and data improvement, with data cleansing techniques that do all the heavy lifting for you.

Unlike solution providers who focus only on crossing the finish line, Kinsmen Group is devoted to the lifetime value of your new solutions. We deliver long-term transformation that lasts long after we depart.

ACCRUENT HAS NAMED KINSMEN GROUP AS THE MOST INNOVATIVE PARTNER OF THE YEAR

Take RedEye for a Spin

Enhanced by Kinsmen Group's digital transformation expertise, RedEye's SaaS software offers process manufacturers a swifter and smoother way to make their critical infrastructure more reliable.

Discover how RedEye can boost productivity by delivering the crucial information you need right at your fingertips, exactly when you need it.
